Education

Swami Keshvanand Institute of Technology (SKIT), Jaipur, India	2023 – 2027
B.Tech in Computer Science & Engineering	CGPA: 9.4 / 10 (Current)
Matrix Sr. Sec. School, Piplianagar, Gokulpura	2022
Class XII — RBSE	90.80%
Indian Public Sec. Sch, Mandawa (Jhunjhunu)	2020
Class X — RBSE	82.33%

Technical Skills

- **Languages:** Python, C++, C, SQL
- **Libraries & Frameworks:** NumPy, Pandas, Matplotlib, Scikit-learn, Flask, Bootstrap
- **Web & Database:** HTML, CSS, PHP, MySQL
- **Tools:** Git, GitHub, VS Code, Power BI
- **Core Competencies:** Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP)

Work Experience

Coplr	Jun 2025 – Jul 2025
<i>Data Analysis and Engineering Intern</i>	
- Processed and analyzed datasets using Python (Pandas, NumPy) to improve data quality and support accurate reporting. - Wrote and optimized SQL queries involving joins, aggregations, and filters across multiple tables to extract and structure data for analytics and business analysis. - Worked with Power BI and Azure Data Lake to build dashboard reports and support cloud-based data workflows.	
Kistechno Software	Jun 2024 – Jul 2024
<i>Web Development Intern</i>	
- Developed responsive web pages using HTML, CSS, and Bootstrap, ensuring consistent experience across mobile, tablet, and desktop. - Implemented backend features in PHP including form handling, session management, and dynamic content rendering. - Used Git and GitHub for version control, managing branches and collaborating with the team using structured workflows.	

Projects

Intelligent Expense Tracker GitHub	Flask, Pandas, Scikit-learn, Render
- Built a full-stack Flask web application with secure authentication and CRUD operations for multi-user expense management. - Applied Scikit-learn models (Random Forest, Logistic Regression) for expense categorization and anomaly detection, noticeably improving prediction accuracy. - Automated weekly Excel report generation using Pandas and deployed on Render, significantly reducing the time spent on manual reporting.	
Village Era Products GitHub	PHP, MySQL, JavaScript, Bootstrap 5
- Developed a full-stack e-commerce platform for local artisans with product cataloging, cart management, and order processing using PHP. - Designed a MySQL relational database with structured schemas and primary/foreign key constraints to maintain data integrity across all modules. - Built 8 responsive web interfaces using Bootstrap 5 and JavaScript form validation, ensuring mobile-first experience across devices.	

Achievements & Certifications

- **Competitive Programming:** Solved **500+** problems on **LeetCode** and **GeeksforGeeks**; ranked in top **20%** globally on LeetCode.
- **Hackathons & Events:** Participated in **LNH Hacks 6.0** (2024) and attended **Google DevFest 2024**.
- **Certifications:** NPTEL – Problem Solving in C | Databricks Machine Learning Fundamentals | Databricks Generative AI Fundamentals.
